

January 1, 2006

Dear Valued Customers,

Röchling Engineered Plastics certifies that our virgin natural UHMW –PE products do not contain the dangerous substances restricted by article 4 of RoHS–Directive:

We confirm that our products by constitution do not contain heavy metals like Lead, Cadmium, Chromium-VI, Mercury and their compounds.

According to the self-commitment of the plastic manufacturing industry in 1986 we don't use Polybrominated Biphenyls (PBB) and Polybrominated Diphenylethers (PBDE) in our products.

The WEEE-Directive is regulating disposal and recycling of electrical and electronic waste. The compliance with the restrictions of that Directive can only be confirmed by the producer of the final product.

However, for the above-mentioned products of Röchling Engineered Plastics, we confirm that they do not contain any substances listed in Annex II of this directive (2002/96/EC).

The presence of ubiquitous traces cannot be excluded.

Jeff Walker
Plant Manager

Important: This information relates only to the above mentioned materials as delivered in their original packaging. It does not relate to any product made of these materials with or without the inclusion of further additives, such as processing aids or colorants. This information should not be construed as a promise or guarantee of specific properties of the products described or their suitability for a particular application. Any existing intellectual property rights must be observed.
