SUSTANEWS

Röchling Sustaplast LP has installed a new 48" wide sheet extruder for Sustarin C Acetal

To meet the growing demands of our distributors and the markets that we serve, we have increased our capacity again by installing a new 48" wide sheet extruder in Exton, PA. This new machine will primarily run our Sustarin C Acetal Copolymer sheets in thicknesses of 5/8" - 2". A unique benefit is that the sheet is offered oversize on the width and length (as much as 1") to maximize yields for parts and to reduce loss to saw kerfs.

We will continue to offer our calendered acetal sheet ranging from 1/8" - 1/2" thick with it's close tolerance and smooth, shiny finish.

In coming months, we plan to begin extruding SustaPVDF (Kynar) in 48" x 96" and 48" x 120" up to 2" thick.

Features and Benefits

- Generously oversize on width and length
- Better yield optimization
- Fully annealed and stress relieved
- No centerline porosity
- Natural grade meets FDA Regulation 21 CFR 177.2480

Product Offering

Grades: Natural, Black (minimums may apply for custom sizes, grades and colors)

Standard Sizes / Lengths: (1/8" - 2") x 48" x 96"
(1/8" - 2") x 48" x 120"
(3/8" - 6") x 24' x 48"
