

RÖCHLING
Engineered Plastics

Did you know ?

Dear Customer, we would like to make your life easier by giving you **facts and specifications on our products** to help **you** to find **the right products fitting your individual needs.**

Röchling Engineered Plastics produces a broad range of Polystone® M (UHMW-PE) tubes.

Polystone® is Röchling Engineered Plastics trade name for all our thermoplastics.

Röchling Engineered Plastics stocks Polystone® M (UHMW-PE) profiles and tubes.

Polystone® M (UHMW-PE) tubes are preferred in demanding applications throughout the conveyor and material handling industry.

Our tubes are most commonly used as bushings, bearings, packings and idler rollers.

We stock tubes in the range of 2" to 9.398" outside diameter and 1.5" to 8.315" inside diameter.

We offer these sizes in natural but also other sizes and colors upon request.

Röchling Engineered Plastics has 90 years of experience in the plastic business and is the world's largest manufacturer of semi-finished and machined products made from polyethylene and polypropylene.
