

# The same sheet in theory, clearly different results.

Part formed with KYDEX® sheet

Part formed with competing sheet\*

In side-by-side comparisons of two parts made the same way using KYDEX® sheet and other acrylic-PVC sheets with the same specifications, the end results are clearly different: KYDEX® high-performance thermoplastic sheet consistently forms better than other sheet products. Time and again, KYDEX® sheet produces the desired results—a reliably high quality product with fewer defects, less waste, and greater cost-effectiveness. **In fact, KYDEX® sheet results in consistently higher yield sheet to part, which means increased customer satisfaction and less returned product .**

To learn more about the superior formability of KYDEX® thermoplastic sheet, talk to a KYDEX® sheet representative or visit [www.kydex.com](http://www.kydex.com).
