Plastics In The Lumber Industry

The Lumber Industry has many opportunities for a group of plastic materials. They encounter a lot of wear and sticking problems that we can help reduce with the self lubricating properties of many plastics.

Areas to Sell:

- Chain Guides
- Wear Rails
- Chip Bin Liners
- Saw Dust Hopper Liners
- Truss Table Tops
- Truss Table Rollers
- J-Bars
- Saw Tables

Materials to Sell:

- UHMW
- HDPE
- LDPE
- Polyurethane

Advantages to Sell:

- Good Impact Resistance
- Good Noise Deadening Properties
- Good Abrasion Resistance
- Low Coefficient of Friction
- Non-Stick
- Reduced Electrical Requirements

Where to Sell:

- Lumber Yards
- Timber Cutting Operations
- Saw Mills
- Door Manufacturers
- Truss Manufacturers
- Premanufactured Home Manufacturers
- Millworks
- Window Manufacturers
