New Standard Color From Solvay For Medical Grade Radel PPSU

Röchling announces that its standard colors for PPSU will match Solvay's new colors for Medical Grade Radel® PPSU. This is effective July 1, 2012.

Röchling runs as much premixed medical grade products as possible to avoid contamination. We will however work with compounders for special products when required by the medical OEMs. Call Röchling for all you medical grade plastic requirements.
