RÖCHLING

Engineering Plastics

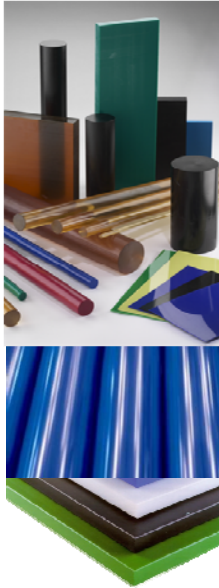

Why Röchling Should Be Your Supplier !

“Shaping the Future
Through Innovation”

Product Range:

Röchling has one of North America's widest product ranges. Producing sheet, rod & profiles we offer many grades & colors of the following products:

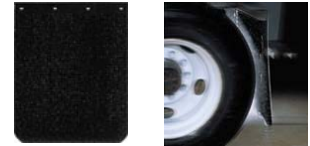

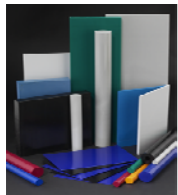

- **HDPE** (Standard, Cutting Board & Pipe Grade)
- **Polypropylene** (Homo & Copolymer)
- **UHMW** (Over 20 grades available)
- **Mechanical Plastics** (Acetal, Nylon Extruded & Cast)
- **High Performance Plastics** (PEEK, Ultem, Polycarbonate, PET, Radel, Polysulfone, PPS, PBT & ABS)

Innovation in Materials:

Over the last 10 years Röchling has been the leader in new product development. Listed below are a few products developed for specific industry requirements over the last 3 years:

- **Metal Detectable UHMW & Acetal**
- **X-ray Detectable** (patent pending) UHMW, Acetal, Nylon & PEEK
- **Polystone Matrox & Polystone Soft UHMW**
- **Splash Control Spray Guard® Grass backed Mud flaps** for splash control. (Note mud flaps are purchased through our transportation division.)

Superior Quality:

Röchling is the only North American manufacturer who has both the ISO 9001-2008 and ISO 13485 quality certifications.

Röchling maintains its ISO 9001-2008 certification to assure quality for all our product lines. Röchling is also the only manufacturer of medical grade (non implantable) plastic stock shapes who is an ISO 13485 certified company.

Röchling believes this commitment to quality will assure you high quality products made under some of the industry's strictest quality procedures.

Medical Grade Plastics:

- Acetal, Radel®, Ultem®, Polysulfone, PEEK®, Noryl®, Polycarbonate & Polypropylene for trays.
- ISO 10993, USP Class VI & Biocompatibility.
- 100% Ultrasound tested.
- Full certifications, Lot & Batch traceability.

Experienced People:

At a recent Röchling sales meeting I took a moment to look around the room and was amazed by the large number of people in the room with over 20 years experience in the plastics industry. Of these people most had over 15 years at Röchling. The experience and time with Röchling says a lot about Röchling as a company. Röchling Engineering Plastics employs over 200 people in North America and they employ over 6,500 people worldwide.

A sign of a good supplier is quality experienced people who have a long tenure with that company. I along with many others are proud to have a very long association with Röchling. Distributors who make Röchling one of their primary suppliers rarely leave Röchling because of the quality people and products. Like Röchling's people their customers become a very important part of this special company.

Modern Efficient Equipment:

I encourage you to visit Röchling and all your vendors. Röchling has the world's newest and most efficient equipment. Many UHMW Presses including (4) 8' x 20'. The world's largest number of UHMW sheet extruders. Mechanical and HPM extruders made in-house are the newest and most efficient in the world. **“Quality Equipment Equals Quality Products”**
